Name: _____ Date: _____

Equal parts

Write the answer in the box. Some answers have a pick list.

1. A shape has 5 equal parts. 4 parts are shaded. Write the fraction shaded.
   💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
   $\frac{4}{5}$

2. A shape has 3 equal parts. 2 parts are shaded. Write the fraction shaded.
   💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
   $\frac{2}{3}$

3. A shape has 4 equal parts. 1 part is shaded. Write the fraction shaded.
   💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
   $\frac{1}{4}$

4. A shape has 2 equal parts. 1 part is shaded. Write the fraction shaded.
   💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
   $\frac{1}{2}$

5. A shape has 3 equal parts. 1 part is shaded. Write the fraction shaded.
   💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
   $\frac{1}{3}$

6. A shape has 8 equal parts. 5 parts are shaded. Write the fraction shaded.
   💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
   $\frac{5}{8}$

7. A shape has 4 equal parts. 3 parts are shaded. Write the fraction shaded.
   💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
   $\frac{3}{4}$

8. A shape has 5 equal parts. 2 parts are shaded. Write the fraction shaded.
   💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
   $\frac{2}{5}$

9. A shape has 10 equal parts. 7 parts are shaded. Write the fraction shaded.
   💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
   $\frac{7}{10}$

10. A shape has 8 equal parts. 3 parts are shaded. Write the fraction shaded.
    💡 Hint: Are all the parts the same size? Only equal parts make a fraction.
    $\frac{3}{8}$
