Name: _____ Date: _____

Fractions on number lines (set 2)

Write the answer in the box. Some answers have a pick list.

1. How many jumps of $\frac{1}{8}$ are needed to reach $\frac{7}{8}$?

   💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

   _____

2. How many jumps of $\frac{1}{8}$ are needed to reach $\frac{2}{8}$?

   💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

   _____

3. A number line from 0 to 1 has 5 equal intervals. What fraction is at the 3rd mark after 0?

   💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

   _____

4. Complete: 0, $\frac{1}{4}$, $\frac{2}{4}$, ____ , $\frac{4}{4}$.

   💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

   _____

5. How many jumps of $\frac{1}{3}$ are needed to reach $\frac{1}{3}$?

   💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

   _____

6. A number line from 0 to 1 has 2 equal intervals. What fraction is at the 1st mark after 0?

   💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

   _____

7. Complete: 0, $\frac{1}{10}$, $\frac{2}{10}$, ____ , $\frac{4}{10}$.

   💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

   _____

8. How many jumps of $\frac{1}{8}$ are needed to reach $\frac{3}{8}$?

   💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

   _____

9 How many jumps of $\frac{1}{8}$ are needed to reach $\frac{5}{8}$?

💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

_____

10 How many jumps of $\frac{1}{8}$ are needed to reach $\frac{1}{8}$?

💡 Hint: Count how many equal jumps from 0 to 1. That is the bottom number.

_____
