Name: _____ Date: _____

Subtract fractions with same denominator

Write the answer in the box. Some answers have a pick list.

1 Calculate: $\frac{2}{2} - \frac{1}{2}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____

2 Calculate: $\frac{4}{10} - \frac{3}{10}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____

3 Calculate: $\frac{3}{8} - \frac{1}{8}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____

4 Calculate: $\frac{3}{5} - \frac{2}{5}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____

5 Calculate: $\frac{5}{5} - \frac{4}{5}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____

6 Calculate: $\frac{4}{4} - \frac{3}{4}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____

7 Calculate: $\frac{3}{3} - \frac{2}{3}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____

8 Calculate: $\frac{7}{10} - \frac{6}{10}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____

9 Calculate: $\frac{10}{10} - \frac{9}{10}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____

10 Calculate: $\frac{2}{8} - \frac{1}{8}$.

💡 Hint: Same bottom number: subtract the top numbers only.

_____
